

VIRGINIA HILL WATER SUPPLY CORPORATION

CUT-OFF VALVE INSTALLATION AND PRESSURE
REGULATOR NOTIFICATION

At the time of new installation of Virginia Hill Water Supply Corporation service, a ball valve will be installed for your use in turning your water off and on. This installation is a one-time service and it is understood and agreed that any future maintenance or replacement of the ball valve is the customer's responsibility. If you are applying for re-service were a meter was once installed, you will need to install a ball valve on your side of the meter BEFORE we will re-service the meter. **The corporation stop on Virginia Hill WSC's side of the meter is NOT FOR CUSTOMER USE!**

I also understand and agree that it is the customer's responsibility to take necessary precautions to control pressure by installing a pressure regulator, if needed, on the customer's side of the meter. All water passing through the meter will be charged to the customer's account. Please check your meter reading periodically to avoid preventable problems.
